And now I

want to test it on my iPod Touch. If I do the usual steps of copying the App to my iPod, and then installing it, it will automatically install itself. But, in order to make this testing/marketing phase, I need to test it on a real device. What is the correct way to do this? Is it possible to install the App directly on my iPod Touch using XCode, without installing it on my

development computer? Thanks. A: Yes you can test it on the real device. You will only need a valid UDID for it. You can find out the UDID of your device in Xcode by clicking on the device in the left panel. I am assuming you want to test on an iPod touch. If you want to test on the iPhone then see here. To install the app on the iPod: Connect iPod to your computer. Launch iTunes. Click on the iPod in the left panel of iTunes. In the right panel, click on the Apps tab and click on the 'Install App' button. Select your device from the list and click the 'Install' button. You can then use the app on the device. Currently, there is no direct or efficient way to place an on-demand direct payment on a legal document. The user experience is cumbersome, inconvenient, time-consuming and prone to errors. This is particularly a problem for borrowers that are remote and require a document issued in a remote legal jurisdiction. The transaction must be carried out using a mail-in payment, paper check, or wire transfer. The lack of direct or efficient on-
